| 39 You will pay the same amount of money at both car parks. | <input type="checkbox"/> | <input type="checkbox"/> |

NATURAL HISTORY MUSEUM LOS ANGELES COUNTY

EXPLORE EXHIBITS: Encounter dinosaurs, experience nature, explore our dioramas, marvel at one of the most impressive gem and mineral collections in the world, and discover how Los Angeles started to be. And that's just the beginning, look at what you can see.

NEW DINOSAUR HALL is one of the most extraordinary dinosaur exhibits in the world, and the premier dinosaur experience in the western United States. Inside are more than 300 real fossils, and 20 complete dinosaurs and ancient sea creatures. One of the centrepieces of the exhibit is the T. rex growth series—the only trio of different aged T. rex specimens in the world. One of the great things about the Dinosaur Hall is how close the design lets you get to the fossils! Look a Triceratops in the eye, or walk under the neck of a 68-foot Mamenchisaurus that's longer than a city bus!

All 20 of the complete dinosaur and sea creature have either never been on display before, or have been reposed according to the latest research. Many were discovered in the last several years by the Museum's in-house Dinosaur Institute.

BUTTERFLY PAVILION as you have never seen! Get up close to beautiful butterflies in our new Butterfly Pavilion. This seasonal exhibit—located outside on the south side of the Museum—features more flight space, more resting spots, and more natural light. There will be hundreds of free-flying butterflies inside, and our awesome Gallery Interpreters who can explain why these animals are so special. The Butterfly Pavilion shows hundreds of butterflies and the plants that surround them, an interaction that has been refined over the course of millions of years. See up close how butterflies use their tubular mouthparts to obtain nectar and witness caterpillars

feed on leaves and go through the process of their transformation into adults. Various butterflies are present at different points during the season and the plants will grow and change. This means that each visit to the Butterfly Pavilion can be a different experience!

THE BLU – an underwater experience for the whole family. Swim alongside manta rays, angler fish, and a blue whale—in virtual reality! Wearing a VR headset, you'll start an incredible underwater journey to parts of the ocean few people get to see first-hand. No swimsuit required. In this high-tech, immersive experience, you'll explore a sunken ship and the sea life around it. Next, you'll walk on a coral reef, where you can interact with sea anemones and jellyfish. The journey ends with a deep dive down to the ocean floor, where you check out a whale skeleton and bioluminescent fish—which means they glow in the dark! This 6-minute expedition is great for any virtual reality skill level. Don't miss this opportunity to experience the latest in VR technology and explore some of the world's most remarkable marine ecosystems.

Museum admission: Your ticket includes Museum admission, entrance to the Extreme Mammals exhibition, and the Butterfly Pavilion. Adults: \$27 / Seniors and students: \$24 / Children 3–12: \$15 / Children under 2: free

Opening times: 9:30 am–5 pm daily. **Closed:** January 1, July 4, Thanksgiving Day, and Christmas Day.

Directions: The Natural History Museum is located in Exposition Park, at 900 Exposition Boulevard between Vermont Avenue and Figueroa Street.

From the 110 (Harbor) Freeway, take the Exposition Boulevard exit and head west toward Vermont Avenue. The Museum's newly opened Car Park will be on your left hand side and costs \$12 (cash or credit card). If the Museum's Car Park is full, parking is usually also available in the State-run lots on your right-hand side. Parking in these lots cost \$12 and is cash only.
