Robber spends three hours caught upside down in a window
Two students at Birmingham University, England, spotted an unusual sight while they were coming back to their dormitories in their campus late in the evening on 10th January. A man had tried to enter their dormitory, but his legs had caught in the window, leaving him hanging upside down. The students talked to him while they were taking photos and making videos of the unhappy man. After that they called an ambulance and firefighters' services. Police and firefighters arrived within minutes, but it took them more than half an hour to release the man. One of the reasons was that they decided to take selfies with the man, who had been hanging in an upside-down position for more than three hours. Rescue workers had to break the window to free the man.

25   **Why did it take more than half an hour to rescue the man?**

1   *Because his legs had caught in the dorm.*
2   *Because the rescuers took selfies with him.*
3   *Because the students took videos of the man.*
4   *Because the rescuers broke the window.*

(...)
In May, Henry Gauley of County Louth, Ireland, found a stray cat in a tree. That's not unusual, but the cat was curled up in a bird's nest where she had given birth to four kittens. The white cat is familiar to the neighbourhood, and Gauley's wife Fiona had fed her before. The nest is round and big enough for the whole cat family to live in. The couple think the nest may have belonged to a pair of wood pigeons who left it a few days ago and now it has furry, not feathered, squatters. Fiona said she will be moving the happy family onto the ground as the kittens do not have the required wings to ensure a safe landing if they fall.

26   **What is the best headline for the article?**

1   *Kittens found on the ground.*
2   *Cat is new in the neighbourhood.*
3   *Cat finds home for its babies in a nest.*
4   *Kittens found with wings on their bodies.*
